

Year 6 have been learning about the circulatory system in Science. They have learnt about how blood travels around the body, the structure of the heart and the difference between veins, arteries and capillaries. The highlight of the week was when they made models of blood; using yellow food colouring to create plasma, red cheerios for the red blood cells, mini marshmallows for the white blood cells and pomp oms to represent the platelets. We may have a class of doctors in the making!

CAN DO CHRISTMAS!

Singing Hands[®]
Hands

The children really enjoyed practising Christmas songs using their hands.

Birthdays! (16th Nov - 22nd Nov)

Happy Birthday to ...

**James
Ryley
Harry
Logan
Olivia
Layton**

Hope you all have a great day!
